Rich Bernarducci

Director of Data Integration at The Nth Power
Charleston, South Carolina Area

Summary

For the last three years Rich has been leading The Nth Power
EPM Data Integration practice, focusing his talents and expertise
on key strategic initiatives to take the practice into exciting new
areas of growth. As A thought leader in EPM Data Integration
with deep experience in FDM Classic going back to Hyperion and
Upstream and extensive experience working with the next generation
of FDMEE, focused on best practice design, Jython scripting and
leveraging powerful new features, he is also working as a lead
architect to define and implement a Best Practice for the efficient
assessment and migration of FDM Classic to FDMEE and Data
Integration design standards for PBCS (Oracle Planning in the
Cloud). Over 3000 existing FDM Classic customers must undergo a
complex upgrade to FDMEE in 11.1.2.4, and the PBCS Cloud is the
hottest new in demand functionality in EPM.
Rich has been instrumental in the definition of the roadmap for the
EPM DI practice, to successfully take it into the next generation
of Oracle's market leading EPM Data Integration products. He
has defined methodologies to provide the highest quality solutions
for each EPM client, tailored to their unique project needs and
requirements. He is committed to deliver all solutions at the highest
quality and standards, as was the rule from 15+ years at Hyperion
Oracle, "Fanatical Customer Satisfaction". With responsibility for
project staffing and resource vetting, providing the best blend of
skills for each engagement and budget. He regularly communicates
directly with key Oracle contacts to insure best possible transition
between the current and next generation of EPM products.

Experience

The Nth Power
Director of Data Integration
April 2016 - Present (4 years 1 month)

Enterprise Data Integration Practice Architect, leading an experienced and talented international team responsible for delivering large-scale data and metadata integration initiatives primarily in the Oracle EPM space.

Providing Best Practice Design and Oversight of Oracle EPM multi-product engagements that integrate across the EPM suit of products and with other third party sources and targets.

Taking on responsibility for operational transition of new solutions into successful Service Delivery and managing supply response to functional project demand.

His objective is to do EPM Data Integration best, bringing a developer's eye and attention to detail to the design methodology for superior Data Integration solutions, guided by a Hyperion Software heritage that strives for and delivers "Fanatical Customer Satisfaction"

The Hackett Group
5 years 11 months

Senior Director - EPM Data Integration Practice
June 2012 - April 2016 (3 years 11 months)

In his role as the Senior Director of the Hackett Hyperion EPM Data Integration Practice from 2012 to 2015, Rich has been instrumental in the definition of the road-map for the practice to successfully take it into the next generation of Oracle's market leading EPM Data Integration products. Rich has assembled a solid team of experienced professionals, and defined a methodology for providing the highest quality solutions to each EPM client, tailored to their unique project needs and requirements. He continues to strive to deliver all solutions at the highest level of quality and standards, as was the rule in his 15+ years at Hyperion and Oracle, "Fanatical Customer Satisfaction". Rich is also responsible for project staffing and resource vetting to provide the best blend of skills for each engagement and budget. Rich regularly communicates with Oracle Product Management and Development to insure the best possible transition between the current and next generation of Oracle Hyperion EPM products. He has had the privilege of being included in a small group of partner representatives to review and provide feedback on the pre-release of Oracle's next generation of EPM Data Integration products, and given the opportunity to provide valuable input about the most important features and functionality used by his clients today and critical to their success in the future.
